When I had the opportunity to get the IT education that I had wanted to pursue during my undergraduate career, I jumped on the chance. As I have progressed through my prerequisites and graduate degree, I am learning every day how valuable code is in our lives and in the creative potential that we can all find in programming. While I do not have the traditional credentials of a programmer, I am more than capable of handling website design, Java programming, and working with databases.

Education

Pursuing a Master of Science in Information Technology, Software Design and Management concentration. Liberty University. Lynchburg, VA.
